The role of AI

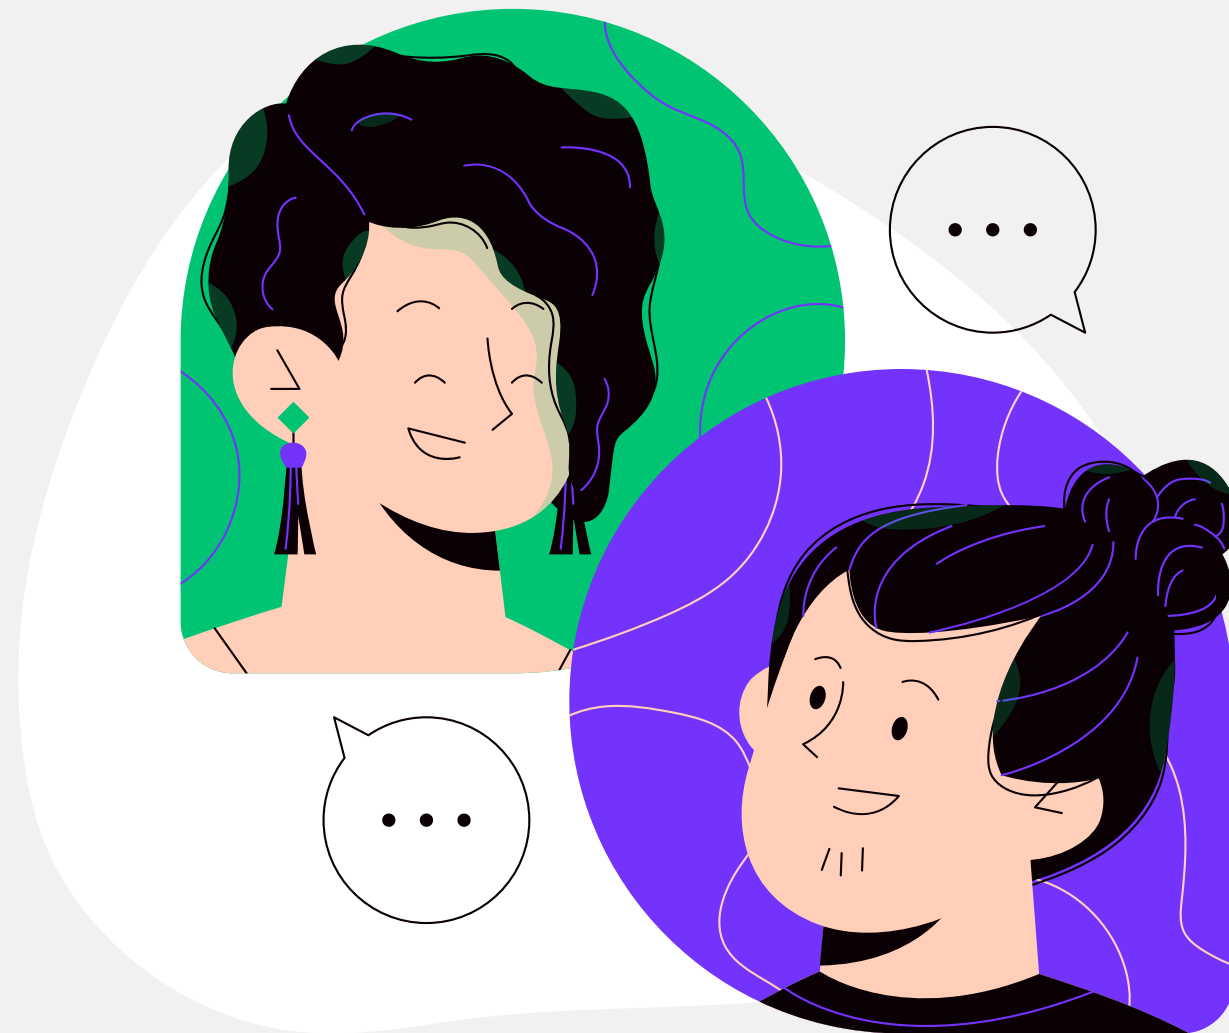

Big impact on every spectrum of life
The need for Data Analytics is rich, is the core to any other industry
--> The opportunity is big
--> Use Data Analytics degree to apply to any industry & any function

Person to person relationship drives the world
With the access to AI & data, people can make better decisions

First job facts

Hard to land your dream job as your first job
Taking the first step through the door can be
challenging, but once you're in, you'll be fine

Being able to use opportunities and grow

Aggressive in Networking & Interviewing

Big companies over Start-ups

Big companies give you mentorship and clear directions while start-ups may take you nowhere

Joy - Experience - Value

How you want to apply your talent and make it into joy

Sometimes it
takes 10 NO to
get a YES

Don't be discouraged! 😊

Stay true
to yourself.
